**CT**  
climbing  
technology

Lightweight and versatile adjustable harness, developed for mountaineering, ice climbing and sport climbing.

Main features:

- design that ensures a superior distribution of the load and excellent comfort during suspension;
- ergonomic waist belt with no pressure points and leg loops with a T-shaped structure that ensure excellent fit and freedom in the movements;
- comfortable mesh3D interior, that ensures excellent breathability and quick drying;
- equipped with four adjustable buckles in light alloy, for fast adjustment and an optimum adaptation to the body in various activities (mountaineering, climbing, ice climbing, etc.);
- four large tapered gear loops for a better allocation of the equipment, and an extra two small gear loops (only one on size XS-S) located on the back for placing accessories and two slots to accommodate the carrying-tools carabiners ([TRUCK](#)) or hammer holster ([HAMMER LODGE](#));
- rear loop for the chalk bag.

  Anthracite / Mustard Yellow
