

All-round mountaineering ventilated helmet, designed to ensure greater head protection. Ideal for mountaineering, ice climbing, rock climbing, canyoning and Via ferrata.

Main features:

- hybrid structure consisting of an outer shell in ABS and an inner shell in EPS;
- specifically shaped lower profile to increase the impact protection area;
- impact and scratch-proof outer shell;
- close-fitting form that makes the helmet stable on the head and reduces its bulk during use;
- the amount of ventilation makes the helmet one of the most ventilated in its category and allows excellent temperature regulation even on the hottest days;
- symmetrical webbing headband adjustment system that allows simple size adjustment;
- fabric structure of the headband system makes it breathable and durable and is easily replaceable;
- headband adjustment system enables you to tie your hair up in a ponytail;
- washable and comfortable non-absorbent padding;
- equipped with four clips for your headlamp or ski mask;
- adjustable size from 54-62 cm.
